

java::util::HashMap  
< String, Item >

```
classDiagram
    class HashMap["java::util::HashMap<String, Item>"]
    class ItemList
    ItemList --|> HashMap
```

The diagram consists of two class boxes. The top box, representing the superclass, is divided into three horizontal sections. The first section contains the text 'java::util::HashMap' followed by '< String, Item >' on the next line. The second and third sections are empty. The bottom box, representing the subclass, is also divided into three horizontal sections. The top section contains the text 'ItemList'. The middle section is empty. The bottom section contains the text '+ transfer()'. A blue arrow with an open triangular head points from the top of the 'ItemList' box to the bottom of the 'HashMap' box, indicating an inheritance relationship.

ItemList

+ transfer()
